## PTSD Treatment Guides

Over recent years, several organizations have created guidelines for the treatment of various disorders, including PTSD, dissociation, and related issues. This page collects links to online versions of treatment guides relevant to emotional trauma issues, as these guides may be helpful for some clinicians.

Please note that the [Disaster](#) page includes a section of links to [disaster mental health \(DMH\) guides](#), primarily of interest to disaster workers. While DMH guides focus on issues pertinent in disaster areas (and for individuals in crisis), they may also be useful for clinicians dealing with patients in crisis. In either case, please explore the disaster mental health guides as well as the treatment guides listed below.
